

Home Buddies Cam Quick Set Up

1. Take the camera out of the box and attach the antenna
2. Use the Ethernet cable to plug the camera into your home router
3. Plug the power cable into the camera and an outlet

The camera is now live for viewing over the internet. Using Internet Explorer, go to www.myhomebuddiescam.com and select View My Cam. Input the Cam ID and Password that came on the card with the camera. Away you go.

Connecting the Home Buddies Camera to Your Wireless Network

1. With your camera plugged in as described above, install CamView software onto your PC. It is on the CD that came with your camera, or it can be downloaded from www.myhomebuddiescam.com/downloads.html.
2. Start CamView. You will see the Camera ID on the screen:

3. Right Click on the Cam ID and select *Web Configure*. Input **admin** for the username and leave the password blank.
4. Go to *Network* then select *Wifi Security*. Here you will be able to input your home network's SSID and WEP key. Check *Enable WiFi Function* before doing so.

Wireless Day&night IP Camera

The wisdom to learn from experience,
the courage to push the limits,
this is the combination that leads to lasting success,
this is the world of administrative engineering.
Design and comfort, safety and performance.
This are the key elements of the nature of the 8080 1 Series.
